All About Ants

BY ______________________
Ants are insects. They have 3 body parts: head, thorax and abdomen. They live in colonies in nests built underground. They live everywhere except Antarctica.

Queen ants lay the eggs. Worker ants get food and take care of the eggs. They use their antennae to smell, taste, and feel. They protect themselves by biting or stinging. They can be black, red, yellow or brown.

Did you know? They can lift 20 times their weight!
