All About Giraffes

Giraffes are the tallest land mammal. They live in Africa or in a zoo. They have six foot necks that weigh about 600 pounds. Their legs alone are about 8 feet tall. They can run as fast as 35 miles per hour for a distance of 10 miles. They have horns called ossicones. Giraffes have spotted coats with a square shaped pattern. They eat buds and leaves from the Acacia trees. Baby calves are 6 feet tall at birth!
