

# ANTARCTICA ANTICS!

Book created by Judy Bonzer  
Graphics by DJ Inkers,  
& Web

By \_\_\_\_\_

Antarctica is home of the South Pole and is located at the bottom of the world. It is the coldest place on earth and has the worst winter weather. It is made up of 98% ice.

1.

The emperor penguin is the largest of all penguins and is 3-4 feet tall. They are the only large animal that remains in Antarctica during the long dark and very cold winters.

2.

The Adelie penguin is another penguin of Antarctica. They leave to head north with the onset of winter between June and August.

3.

The extremely cold waters around Antarctica are full of krill, a shrimp-like creature. They are a favorite food for penguins.

4.

The Weddell Seal is one seal of Antarctica. They live at the edge of packed ice wherever there is a breathing hole or tide crack.

5.

The killer or orca and the blue whale are two whales that live in the Antarctic waters. The whales go to warmer waters during the winter.

6.

Snowy Petrel

Skua bird

The snowy petrel and the skua bird are two other birds of Antarctica. Birds have waterproof feathers and downy feathers to keep them warm.

7.

8.

Directions:

Fold each page in half with the writing to the outside.

Slip the numbered pages in order inside the cover page with the folded edge to the outside or right side of the book. Staple the pages together on the left side. Having the pages folded instead of cut apart makes them sturdier. Also, you can print the cover page on cardstock to make the book last longer.

Enjoy!
