They come in many colors,
Flying through the nighttime air.
They use sonar to guide their way,
Those bats are everywhere!

They eat so many little bugs,
The farmers love them so.
But when the daylight comes along,
Do you know where they go?

**Bat Facts**

1. Bats are the only flying mammals.
2. Bats are "nocturnal," meaning that they are awake at night.
3. Bats hang upside down to sleep.
4. Many bats use sonar to find food.
5. They eat fruits, flowers, insects, frogs, fish, small mammals, reptiles, and blood of vertebrates.
6. Some bats can eat 600 or more mosquitoes in a single hour.
7. Bats live between 4 and 30 years.
8. Many bats are endangered.
9. All bats can see, some better than us.
10. Bat babies are called pups.
