

We celebrate Earth Day every year on April 22.
It is a day to remind us to take care of our planet, Earth.
We can take care of our planet in many ways.

We can keep our planet clean by using the rules of
"reduce, reuse, recycle".

Reduce means to use less of something. We can use less water or gasoline. **Reuse** means to use something over rather than throwing it away like boxes, plastic, or glass. **Recycle** means to make something new from something old. We can recycle plastic, aluminum, and paper by taking these things to a recycling center.

We need to remind ourselves to do these things to help keep our Earth clean not just on Earth Day but every day!

1. We celebrate Earth Day on _____.
2. Recycle means to make something _____ from something _____.
3. Reduce means to use _____ of something.
4. On Earth Day we remind people to _____,
_____, and _____.
5. People should take care of the Earth _____!
