

Facts About Spiders

Name _____

Spiders are arachnids.
They are not insects.

1

Spiders have 8 legs.
They have 2 body parts:
a thorax and an abdomen.

2

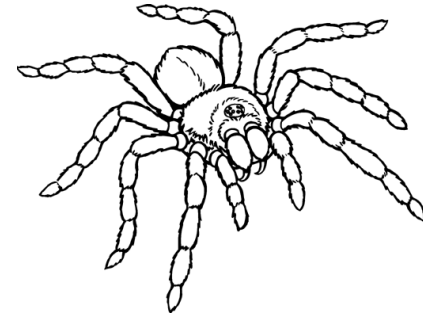

Even though most spiders have
6 to 8 eyes, they don't see well.
They use the hair on their bodies
to sense where they are going
and to feel vibrations.

3

The hard covering on the outside of a spider's body is called an exoskeleton.

4

Most spiders have fangs, through which venom is ejected to kill their prey.

5

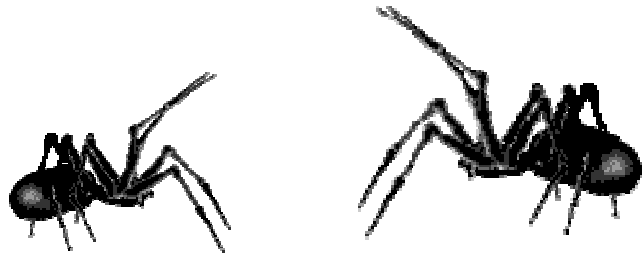

Spiders have spinnerets on the end of their abdomens to spin their webs of sticky silk.

6

Spiders are oviparous which means their babies come from eggs.

7

Male spiders are smaller than female spiders.

8

The Brown Recluse and the Black Widow spider are two poisonous spiders.

9

Spiders eat many insects which helps keep gardens free of pests.

10

This is my spider!
