Fall or Autumn is the season that comes between summer and winter. There are many changes that begin in this season. Days become shorter. Leaves of trees turn from green to red, yellow, orange, and brown. Trees need lots of sunlight to keep their leaves green. Without sunlight leaves turn colors.

Animals start storing up a food supply to last the long winter months. Temperatures outside start to get colder and we see frost on the ground. We need to wear a coat or jacket outside.

Trees start to lose their leaves and they fall to the ground. It is fun to jump in the leaves that we have raked together!

Fall is fun!
