Flamingos are birds famous for their bright pink color, stilt-like legs, and S-shaped necks. Their habitat can be shallow lakes, lagoons, sandy beaches, or swamps. They live in large groups into the thousands or more. They can be noisy with their honking sounds!

Flamingo parents will take care of their babies for up to 6 years. Flamingos can live to be 40 years old. They eat fish, snails, shrimp and algae. They can "run" on the water because of their webbed feet.

They eat fish, snails, shrimp and algae. They can "run" on the water because of their webbed feet. They are long living birds and can live to be 40 years old. Flamingo parents will take care of their babies for up to 6 years. Flamingos are one of the longest living birds and can live to be 40 years old. Flamingos can live to be 40 years old.
