Jellyfish moving free
In the deep blue sea.
Floating side by side
They glide and glide.
Moving to and fro.
Where do they go?

Circle the rhyming words in the poem and write them on the lines below.

Side and __________
___________ and go
free and __________

Add 2 jellyfish to the picture below and color.

Jellyfish

They eat plankton.
They use tentacles to sting.
Jellyfish have no brains.
A group of jellyfish is called a "bloom." They can be brightly colored.
Through...some are transparent or see-through.
They can look like umbrellas.
They live in all oceans.
Jellyfish are not fish.
