My jack-o’-lantern face!

All About Pumpkins

BY
A pumpkin grows from a pumpkin seed. A pumpkin sprout grows from the seed. A leafy vine grows from the sprout. A yellow-orange flower grows on the vine. A tiny green pumpkin grows after the flower withers. The pumpkin grows larger and changes to an orange color. Pumpkins are our largest fruit. Each pumpkin has about 500 seeds.

Pumpkins are used for decorations or jack-o’-lanterns. They are used to make pies, pudding, breads and other food. Pumpkin seeds can be roasted for a snack. Pumpkins are also used to feed farm animals.
