The Polar Bear

Mother bears take very good care of their cubs. They have strong legs and furry webbed feet.

- Their favorite foods are fish and seals.
- They are excellent swimmers.
- They can be eight feet tall.
- A polar bear can weigh 1,000 pounds or more.
- They have blubber under their skin to keep them warm.
- They have thick, clear that look white.
- Polar bears live around the North Pole.
