Puffin Facts

- Sometimes called “sea parrots”!
- Fly through the air like most birds
- Sem to fly through the water using their wings like paddles and webbed feet to steer
- About the size of a pigeon but very stocky
- Black and white feathers
- Colorful large curved beaks
- Females lay one egg at a time in a “burrow”
- Both mother and father take care of the egg
- Spend most of their time in the air or ocean
- Eat fish and can hold as many as 10 or more fish in their beaks at one time
- Spend most of their time in the air or ocean
