3. A rainbow is a full _____ but you only see _____ of it from the _____.

ABC Order

circle
sky rain
arc sun
ground

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____

Write the words in ABC Order on the lines.

A rainbow is a multi-colored arc that forms in the sky. It is made when there is light or sunshine and there is water in the form of rain, mist, dew, spray or fog. A rainbow is a full circle but we only see half of it from the ground. If you were riding in an airplane above the rainbow you might see the whole circle.

Most rainbows are made up of the primary colors. The colors of the rainbow are red, orange, yellow, green, blue, indigo, and violet.
