

SPRING

Spring is one of the four seasons. It comes after winter. The days get longer again and the temperature starts to warm up. Leaves on the trees turn green and grass starts to grow.

Birds and butterflies come back from the south. Hibernating animals start to wake up. Animals are having babies.

Early flowering plants start to grow. It helps to have nice spring showers to help them grow. You might even see a rainbow after it rains!

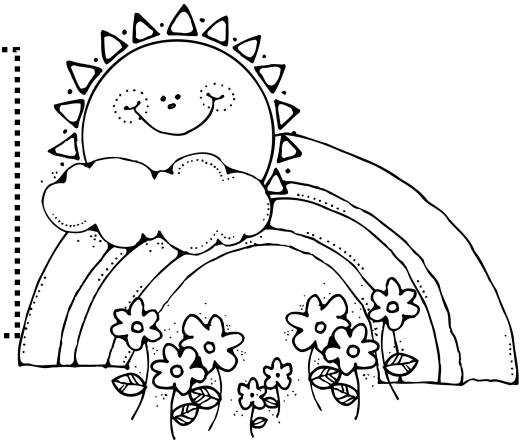

In spring you can fly a kite, ride your bike, play baseball, or soccer.

Spring is fun!

Star Words

grow
rainbow
showers
warm
